Memorandum

MEMORANDUM FOR:

25X1A9a

SUBJECT:

Deployment and Mobility of Guided Missiles by
Railroad and Highway in the European Satellites

1. We have just completed a brief report on the deployment of Soviet guided missiles in the European Satellites and the possibility of a mobile system of deployment. The paucity of information on the subject has compelled us to confine our report to a hypothetical analysis and a considerable amount of pure speculation. Nevertheless, we feel that the substantive intelligence contained in the report will serve as a guide to collectors of information and as an amplification of requirements which we hope to disseminate soon.

2. I would appreciate your passing this report to [redacted] suggesting that his comments will be appreciated. If you, also, have any comments, please let me hear from you.
